Subject: Verification of Final Volume

Hi Dave,

Over the course of the last Alt. 4 iterations, we have had discussions about total volume, cleanup passes, etc. When I double-checked your volume calculation from your 4/17/09 comments on the 1-CAD-Cell approach @ \$80M, it appears you add 10% cleanup passes to the MU1-24, -102 - 105 dredge volumes only. When we spoke Friday (5/1/09) I was under the impression that we were adding 10% to everything north of the bridges (i.e., MU1-24, -102 - 105, and -25 - 31).

Would you please clear up the discrepancy in either my memory or my notes? The attached spreadsheet shows the total volumes depending on where we make the cut-off.

Thanks,

Anita
